This piece addresses the concept of being replaceable, the awareness of being interchangeable, and being alone within the many. Emptiness consumes your identity. You go through the motions of life, unable to recognize the familiar while searching for a path back to the authentic individual, knowing it may be lost forever.

Music: John Lennon, Imagine

Passionate about training and mentoring future generations of dancers, Sara continues to teach in the Chicagoland area and guest teaches around the country.

She is also the Producer of JOY: Ballet Coloring Pages celebrating all humanity for young dancers, which is featured on SaraBibikDance.com, a platform to distribute educational and joy-filled material for dancers and their support teams.

Honored to be part of Team DWC, Sara's position as **Dance360** Program Director allows her to work with dancers "on the precipice". As dancers 15 – 25 years old continue their training, compose their next steps, become team members, and take-on leadership roles, she is honored to create a holistic space for excellence, kindness, and community.

Founded in May 2007, [DanceWorks Chicago \(DWC\)](#) is committed to building a foundation for early career artists by providing a creative incubator from which dancers and choreographers propel themselves and the art form to a new level of artistry through training, collaboration, mentorship, and performance. DWC invests in artist cultivation through ongoing technical training and professional development, intense and intentional mentorship, collaborations and relationship-building with a global perspective, and performances shining a light on dancers and dance.

SEASON 18...#WeGrown

DWC aspires to provide a platform where artists can exercise their muscles of courage, creativity, and curiosity.

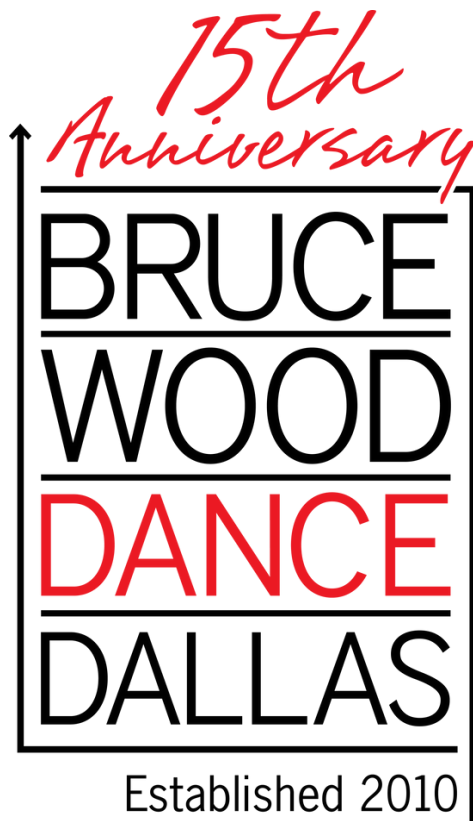

"We say we want to be more curious in our own lives, but we consistently make choices that optimize our familiar and established habits and ways of thinking. This is what makes the act of being curious both so highly valued and so uniquely rare. We know exploring the unknown can lead to new discoveries, but we have a hard time rationalizing how to block off the time to do so if it means losing time that would guarantee progress somewhere else." -Amy Stanton

Always moving.
